

# Space thingy!

By: Marcus Larsson

One time in a classroom there was a teacher called The hoodie guy, cause he always wears a grey hoodie and an flat cap. He has light skin, and jeans. This day he has anyway. He works with astronomy in a classroom in a school in the middle of nowhere.

He walked in to the classroom and he said that he thought that he wasn't good at astronomy, he works with it cause he is the best teacher in the school in astronomy. He is it cause the school sucks. Later the whole class and the teacher shot themselves into space somehow.

I don't know how they did that, I'm just a storyteller.

Then the planet Mercury came and hit the teacher, and the teacher said:

- Mercury you speedy, globe, ball thingy!
- Look at all the dots, says a pupil.
- All the dots you see there are stars, I think? says the teacher.

When they are talking, the planet Pluto comes and hits the teacher again.

- What are you guys doing? says Pluto.
- Oh, hey Pluto, how are you doing? says the teacher.

Pluto flew away.

They see a supernova.

- OH, Supernova BABY!  
shouts the teacher.

- That is going to happen  
to our sun in a billion years  
or something, I think? says  
the teacher.

And then they shot  
themselves down again to  
the classroom. I don't know  
how they did that, as I said,  
I'm just a storyteller.

THE END
